Reflexive AI

TEMPORARY WORKING DEFINITION

# AI usage in organizations is Human-Centered when it:

- Is not used in a manner that harms other living beings emotionally, physically or financially
- Prioritizes human needs and autonomy in design and application
- Makes outcomes transparent, interpretable and verifiable
- Is inclusive and supports continuous learning
- Minimizes environmental impact through energy efficiency and sustainable practices

**Yes, this definition is incomplete, lacking and imperfect in many ways. This initiative aims to improve it collaboratively.**
