

Human-centered AI — Pre-mortem

// THEME

-  **Write clearly.** These notes are our only record — we and others need to read them later.
-  **Keep it non-sensitive.** Avoid personal data and business-confidential information.
-  **Every view counts.** Note disagreements too — there are no wrong answers.

FAILURE MODE

1 Imagine what it would look like if AI was not human-centered for this theme. What would happen, or not happen?

RECOGNIZE

2 What do you recognise from your own organization? Or where is it trending in an undesirable direction?

PREVENTION

3 What can we do to prevent undesirable outcomes from occurring? Or at least make them less likely?

MONITORING

4 What indicators, signals or evidence can be tracked, monitored or audited to avoid undesirable outcomes?
