

World Café

Session results: what participants said about human-centered AI, and what they voted most important.

// SESSION

September 29, 2026 · Company @ NL

21 participants, including 2 facilitators. All five stations were run. Responses are transcribed as written, including original spelling.

SESSION DETAILS

FACILITATORS	Barry Overeem and Christiaan Verwijs
DATE	September 29, 2026
PARTICIPANTS	21 (including 2 facilitators)
COMPANY	Industry / Energy · size 50-100 · NL
INFORMED CONSENT	From all participants (available at Lucid Institute)
TRANSCRIPTION	Claude AI (verified by Christiaan Verwijs)
ANONYMIZATION	Christiaan Verwijs (verified by company contact)

OPENING EXERCISE

Impromptu Networking

“What does human-centered AI look like for you? How does this relate to your work or this organization?”

#	RESPONSE
1	AI as assistant and KEEP humans in control and responsible
2	No AI
3	People using AI to the benefit of people.
4	Human centered AI is: AI in service of humans improving our work experience
5	Make people smarter not dummer
6	Human Centered AI is a tool where the human is in charge and makes the life of a human better and more fun
7	A helpfull intuitive tool that augments/empowers you to improve development in a not not fun
8	human control of AI to assist and empower individuals and teams
9	- Tool to complement rather than replace. - What makes us human? - Not take satisfaction away

STATION 1

What human-centered AI looks like

“What should human-centered AI look like in your organization? What results or outcomes would you see?”

#	RESPONSE	VOTES
7	It is a tool FOR people, not a tool to replace people.	15
1	Outcome: Efficient workflow & happy people (without this feeling like a trade-off)	12
8	Performance should not only be measured on output, also on quality.	9
5	The creation process must involve humans working together.	8
10	Company-wide we should regularly evaluate the impact of AI on people.	6
9	[this company] should take a role in selecting/offering tooling that aligns with our values.	5
4	People should still be able to use their creativity in the ideation phase.	1
2	Users have the autonomy to chose how they use the tool.	0
3	Responsibility for results is with the end user.	0
6	Using more AI is not a goal, it is just another tool in the tool-box.	0

Sorted by dot votes, highest first. “#” is the original position on the sheet; ties keep sheet order.

When AI helps

“How has AI been used in your organization in a manner that improved the work experience or work enjoyment of employees?”

#	RESPONSE	VOTES
26	Supports learning · help with learning	13
17	Better quality · product > better quality, find bugs faster, better test suite	9
4	Offload trivial work · removes repetition	8
6	Speeds up work · Speeds up work, so we can stay in the creative flow	4
12	Speeds up work · results in a better product = more fun!	4
18	Better quality · improves trouble-shooting we find issues faster	3
8	Speeds up work · get more things done	2
11	Speeds up work · do things in parallel → maximise speed	2
1	Offload trivial work · offload trivial things we don't like doing	1
3	Offload trivial work · reads documentation	1
14	Purpose shift · more creativity on the feature, less struggle on the code	1
15	Purpose shift · Focus on the WHAT instead of the HOW	1
19	Better quality · better customer support	1
20	Better quality · prevents you to make mistakes	1
24	Better insights · combine multiple systems to make sense of things	1
25	Better insights · better insights, more human control, better decisions	1
27	Supports learning · faster research	1
2	Offload trivial work · presentations, unit tests	0
5	Confirmation when it's a good job	0
7	Speeds up work · limits interruptions	0
9	Speeds up work · Create things that I could not have done before → go further + deeper into the feature	0

STATION 2 (CONTINUED)

When AI helps

#	RESPONSE	VOTES
10	Speeds up work · easier to make the product look good without having in-depth knowledge.	0
13	Purpose shift · Shift from "how to solve this feature request" to "what does our customer want" from code to feature	0
16	Purpose shift · Creating tools that serve the customer better	0
21	Better quality · helps with dyslexia to correct grammar	0
22	Better human connection · creates more context to improve human 1:1 conversations → more connection	0
23	Better human connection · creative sparring – brings people together	0

Sorted by dot votes, highest first. "#" is the original position on the sheet; ties keep sheet order. Bold text is the cluster a response was placed under.

STATION 3

When AI gets in the way

“What are examples in your organization where the use of AI was not human-centered, or where could you see it easily sliding down that path?”

#	RESPONSE	VOTES
3	More trust in AI turns in blind trust	14
12	Losing skills Human	12
13	Human interaction is important in work	11
6	Difference between AI and human documents	4
4	AI vs Human	3
8	Claude Tag trial was stopped	3
9	Different mindset in using AI. What do we allow?	3
5	[Internal product name] for taking over actions	2
7	Human filter on AI	1
1	- Pretty good - Find solutions that dont work - Conservative in using	0
2	Skills for Jira tickets?	0
10	What is the goal of AI?	0
11	What is your role as developer?	0
14	AI as Emotional skill?	0
15	AI as commenter in reviews is not good for motivation	0
16	It is not human-centered if we loss skills? and thus control	0

Sorted by dot votes, highest first. “#” is the original position on the sheet; ties keep sheet order.

STATION 4

Rules & procedures

“What procedures, rules or processes should be implemented to ensure human-centered AI in your organization?”

#	RESPONSE	VOTES
1	A human gate to validate AI's work	12
5	Co-creation with a human	12
11	Create guidelines for what is acceptable for AI. Boundaries for AI	10
8	Don't accept: "AI told me so."	9
10	Hold discussions around AI and its effect on individuals and teams	6
9	Ask about effect of AI in surveys.	2
3	Feedback from human(s) on your work	1
7	Stay critical. Stay smart	1
2	1 person responsible	0
4	Done through human interaction	0
6	Ensure the person understands their work	0
12	Make documentation human again	0

Sorted by dot votes, highest first. “#” is the original position on the sheet; ties keep sheet order.

STATION 5

Measurement & auditing

“What could be measured, tracked or audited to ensure that the way your organization uses AI is human-centered?”

#	RESPONSE	VOTES
4	AI check-in sessions (with the team)	14
9	only employees have the answer - ask them	13
10	Add question to review merge request (for submitter + reviewer)	9
1	adding questions to employee engagement survey?	3
3	give training? about responsibility / Run[illegible] AI?	3
6	tracking number of tokens used? Is it high? X	3
2	training in [security training platform]? (more compliance, remain in control)	2
7	Exit conversation + survey	1
5	- template? - fixed host? - face to face	0
8	3-6-9 feedback surveys	0

Sorted by dot votes, highest first. "#" is the original position on the sheet; ties keep sheet order.

ACTION

15% Solutions

Actions participants can take without extra permission or resources.

#	RESPONSE
1	regular checkins where we discuss what human-centered AI means for us.
2	amend the AI policy to include the definition of human-centered AI
3	Somehow widen the conversation, bring it to MT
4	How I use AI - How long do I keep prompting - When do I ask a colleague?
5	Add question to merge request: AI helped me (1-5) as builder as reviewer so we have data for discussion (retrospective)
6	- adding AI-related question to employee eng. survey, exit survey, 3/6/9-month survey, check with - Add [security training platform] to add AI centered training (if no costs)
7	Pair up to teach skills that AI is taking away
8	Be more aware if questions can be asked to a colleague rather than AI
9	Decide on boundaries of use of AI for myself, then try to get agreement on a team level
10	Create processes & guidelines for my team to balance the usage of AI. Goal?
11	Kick-Off conversation if we should switch to a European AI
12	Run a "Why" conversation during MR-reviews so both persons understand what (AI) was builded (why not this, why not that?) no, AI told me so
13	self reflection what I used AI for at the end of the day
14	Test AND keep Validating output, and stay connected and keep working together
15	Steer product team to position human-AI over Robocop - Role model Human-AI
16	- Start AI prompting sessions pair programming with other colleagues - I think one of the things people like is prototyping. Should we have prototype Fridays?
17	Stimulate group refinements and pair programming.

15% Solutions

#	RESPONSE
18	- Stay critical when using AI - stay in touch with other people
19	Keep the discussion about Human-centred AI going
20	Improve workflow on communication using AI tool
